

SERVICE BULLETIN

U-S Safety Trolley Products Are Being Discontinued

Dear Customer,

U-S Safety Trolley products are being discontinued by the manufacturer. This will especially affect customers with Granco Clark Pullers. All components relating to the power rail including collector arm, collector housing, copper conductor and conductor shoes, etc. will only be available as long as supplies last. Please order enough supplies to last for the foreseeable future. Granco Clark will stock as much of these products as we are able to get until manufacturing is halted. We sincerely apologize for this inconvenience as it is out of Granco Clark's control. Please contact your Granco Clark sales representative if you are interested in an upgrade package to replace your conductor system.

Sincerely,

Granco Clark
7298 N. Storey rd. Belding, MI 48809
